

# Knee Pain Hurts Providers as much as Patients!

## ➤ Why KneeKG?

Enables doctors to quickly direct and guide the right treatment plan to reduce pain, increase daily function, optimize patient's quality of life, in a more efficient timeframe than current knee care pathways

## ➤ Provides Solutions for Stakeholders' Issues

- ID what to address exactly with non-surgical patients or patients looking for conservative care
- Highlights kinematic patterns that can be addressed in patients having residual pain post-surgery
- Increases patient engagement
- Eliminates subjective interpretation that leads to a high number of interventions and charges
- Reduces current use of pain medication

## ➤ How?

### ■ DATA-DRIVEN CARE PLAN/CLINICAL DECISION

Provides Root Cause Analysis and Accurate Data about Biomechanical Markers to be Addressed to Reduce Pain and Medication intake, Increase Daily Function and Quality of Life

### ■ OBJECTIVE OUTCOME MEASUREMENT "Continuum of Care"

Aids in Negotiations w. 3<sup>rd</sup> Party Payers, Increases Patient Satisfaction and Engagement. Leading to More Patients, Referrals, Practice Builder

### ■ NEW REVENUE CENTER

CPT Codes Applicable

### ■ BASELINE TESTING

Attract & Screen Young Athletes, Establish Baseline Function

## ➤ Quick Assessment and Results

15-minutes assessment per patient with immediate results
